

# Ascent

GREEN  
FURNITURE  
CONCEPT

## Flexible by design

Ascent is a flexible, modular seating series designed to adapt as spaces change. Developed in collaboration with architects, Ascent offers endless configurations that adapt to changing needs — extending its lifespan, adding value, and reducing long-term costs.

The organic shapes were inspired by nature, blending functionality with aesthetics for a timeless design. Thoughtfully crafted with sustainable materials, it brings life and movement to any space. This way, Ascent is more than just seating; it invites interaction, movement, and a sense of place — bringing people together in meaningful ways.

## YOUR SPACE IS UNIQUE

Ascent is characterised by its sculptural contours and sloping backrest. Its flexible modules can be configured into a variety of curving shapes and vibrant colours, creating dynamic back-rests and eye-catching silhouettes. Whether making a colourful statement or blending seamlessly into its surroundings, Ascent helps create unique spaces that bring your creative visions to life.

## DESIGNED FOR ALL

Ascent's ergonomic, modular design ensures accessibility for everyone everywhere. Elevated accessibility seats, removable cushions, and armrests integrate seamlessly, with clear signage for ease of use. A variety of colours allows for colour-coded zones, enhancing both function and inclusivity.

## A CONSCIOUS CHOICE

The combination of responsibly sourced wood and hard wax oil allows for on-site maintenance, ensuring lasting quality. With recycled steel and a minimum of 75% recycled post-consumer aluminium, Ascent is a sustainable and smart choice for any space.

## BRINGING NATURE INDOORS

Integrating planters into Ascent brings nature closer, enhancing both aesthetics and well-being. They can be placed at different points on Ascent, making it a truly biophilic modular component.

## A FUTURE-PROOF INVESTMENT

Designed for durability, all our products are robust and resistant, supporting a longer use cycle. Each component can be replaced individually, making maintenance and repairs easy while extending the product's lifespan.

## CHARGING ON-THE-GO

Access to electricity and charging is essential in public spaces. Ascent's smart design discreetly conceals cabling within the beam while allowing flexible charger placement.

## SEAMLESS ELEGANCE

The seamlessly aligned legs of each module create an elegant look, making multiple units appear as one cohesive piece. This thoughtful design enhances aesthetics while also minimising dirt traps, making cleaning effortless.

A MORE EFFICIENT USE OF SPACE

Ascent maximises seating density without having to compromise comfort or accessibility. Unlike traditional linear seating, its convex and concave shapes make better use of floor space.

the same area.

HEALTH AND WELL-BEING

Inspired by biophilic design, Ascent's organic shapes and natural materials create inviting spaces that strengthen the connection between people, places, and nature. Its flowing, concave forms naturally foster social interaction. Ascent transforms public spaces into human-centred places that matter.
