- Shell is also available without armrest
- Other base options are: 4-leg steel base, sled base, wheel base, solid wood legs, and moulded plywood legs
- Other upholstery option is: a soft quilted version with added wadding in a large selection of fabrics and leathers
- Suitable for a wide variety of private and public environments
- Qualified for contract use

AAC 21 & 21 SOFT DESIGN BY HEE WELLING

The About a Chair AAC 21 modifies the more formal expression of the aluminium swivel base with the softness and warmth of the upholstered shell. Retaining the same curved shell with unified silhouette that characterises the entire collection, this design features a functional base with legs that fan out from the centre. The cast aluminium swivel base is available in polished or powder coated finishes, with the post-consumer recycled plastic shell offered in a variety of regular and quilted upholstery options. The multitude of variants and design combinations give this series great versatility in a wide range of corporate, public, and private contexts.

Hee Welling is a Danish furniture designer who founded his own studio in Copenhagen in 2003. The son of a cabinetmaker, Welling's fascination with production techniques, materials, and machinery was fired as a child. He went on to study at The University of Art and Design in Helsinki, and received his master's degree in furniture design from The Royal Danish Academy of Fine Arts. Centred around the idea of creating technically accomplished products that can reach a wide audience, his designs are characterised by a great sense of proportion and quietly elegant aesthetics. Welling has received a number of design awards, including the Bo Bedre Award (Denmark), Good Design Award (USA), and has been nominated as Danish designer of the year in 2013 and 2014. For HAY, Welling has designed the About A series and the Hee Chair, Lounge Chair, and Bar Stool.

SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC™-certified wood (FSC-C148805), and bio-based foam that helps lower our products' overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
