HAY

# BOWLER

## HIGHLIGHTS

- Bowler is a compact side table
- Available in a variety of colours
- Bowler has a simple construction consisting of a flat-pack steel frame and granite base

# BOWLER DESIGN BY SHANE SCHNECK

Shane Schneck's Bowler Table is a compact side table that is ideal for small spaces. The single tube that extends upwards creates a defined profile, which doubles as a functional handle too. The stem, handle and tray are made in powder coated steel, with a solid granite base that provides stability, yet it is still lightweight enough to move around. Bowler comes flat packed and is easy to assemble, making it suitable for all kinds of domestic and corporate environments.

Shane Schneck is an American designer based in Sweden, where he founded his Office for Design studio in Stockholm in 2010. International in his attitude and outlook, he previously lived and worked in Milan with the Piero Lissoni studio. His work has received international recognition, winning Red Dot, iF and Wallpaper design awards. His design ethos is to create simple yet innovative products that challenge industry standards. His products often contain an element of surprise, or are somehow playful or bold in their conception. Perhaps in their colour, form or use of materials. For HAY, Schneck has designed Cap, Rhom Trivet, Lup, Analog, Field, Porter, Bowler, Butler, Bernard and Tamoto Bed.

## SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC™-certified wood (FSC-C148805), and bio-based foam that helps lower our products' overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
