- The shelves have concealed hooks for additional hanging
- Easy to mount
- The shelf can be used in multiple rooms also in wet rooms
- Suitable for a wide variety of private and public environments

KORPUS SHELF DESIGN BY ANDREAS BERGSAKER

Korpus Shelf is a series of colourful wall-mounted shelves created for HAY by Norwegian product designer Andreas Bergsaker. Based on the desire to create a durable multi-purpose shelf from recyclable material, Korpus Shelf is made from sheet aluminium, known for its lightness, strength and ability to be reused countless times. The aluminium undergoes an industrial stamping and punching process to be formed into the distinctively curved column and top. Keyhole slits at the back facilitate mounting, while concealed hooks in the column provide additional hanging possibilities. Available in a wide range of sizes and colours, these versatile shelves can be used in many different rooms in the home, such as a coat rack in the hallway, storing kitchen utensils, hanging bathroom towels or displaying ornaments in the living room.

Andreas Bergsaker (b. 1990) is a Norwegian product designer based in Copenhagen, Denmark. He graduated with a master degree in Product Design from Oslo and Akershus University College of Applied Sciences (HiOA) in 2015. His work covers different everyday objects, designed for product longevity and generations to come. His designs are rooted in exploration of material and shape, and referencing cultural heritage with emphasis on traditional craftsmanship, industrial production processes and tactile qualities. His work has led to exhibitions in London, Milan, New York, Oslo and Stockholm. For HAY, Andreas Bergsaker has designed Korpus Shelf and Chisel Lounge Chair.

SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC™-certified wood (FSC-C148805), and bio-based foam that helps lower our products' overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
