- Seat and foot ring rotates 360 degrees
- Its versatile presence makes it suitable for a wide range of public and residential environments
- Qualified for contract use

# REVOLVER BAR STOOL DESIGN BY LEON RANSMEIER

HAY's Revolver Bar Stool is positioned on a bearing mechanism that enables the seat and footrest to rotate 360 degrees. The slim, slightly dished seat features curved edges for additional comfort, while the footrest provides support and the weighty base creates total stability. The rotating feature, while altering appearance, also lends a sense of the play to this functional design.

Leon Ransmeier is an American industrial designer who founded the design practise Ransmeier Inc., in New York in 2010. A graduate of the Rhode Island School of Design, his work has been included in the permanent collection of the San Francisco Museum of Modern Art (SFMOMA) and the Corning Museum of Glass. Very much a hands-on designer, Ransmeier develops full size prototypes of all of his works and is a believer in the idea that "use follows form". For HAY, Ransmeier has designed the Revolver Stool.

## SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC™-certified wood (FSC-C148805), and bio-based foam that helps lower our products' overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
